

The Cornerstone

Volume 37, Issue 1

September 1st, 2026

Letter From the Historian

Welcome back, Tau Bates! I hope you have a very happy New Year. My name is Chayut Shinawatra, but I prefer to be called by my nickname, Peak, and I will be your Historian for this semester. I elected to Tau Beta Pi in the Fall 2024 semester, and I am happy to serve in this role

Like last semester, The Cornerstone will be fully digitalized and can be found at tbp.engin.umich.edu/publications/cornerstone. During meetings, The Best Puzzle, One Minute Reads, and a new experimental section will be available in physical copies. If you would like to give feedback about this, please fill out this form: tbpmig.org/digitalcornerstone. If you would like to contribute to The Cornerstone, such as writing the One Minute Reads, submitting puzzles, or giving recommendations, please fill out this form: tbpmig.org/cornerstonecontribution, which will also be available in QR code form down below.

To kick off the semester, here's just a small fun fact! Did you know that memories are reconstructed each time you remember them, which means recalling something can subtly change the memory itself? Our memories are always a little more flexible than we think. I hope everyone has a great semester, and I look forward to being your Historian. Please feel free to reach out to me at tbp.historian@umich.edu, and forever,

Go Blue!

- Chayut (Peak) Shinawatra

In This Issue

- Letter from the Historian
- First Actives
- Upcoming Events
- TBPuzzles
- The Back-Page issue

Meeting Agenda

- Leadership Opportunities
- Electee team leading + interviews
- Voting procedure review
- Voting on amendments

Upcoming Events

- First General: 9/8, 6:30 - 8:30 PM
- Engineering Student Welcome: 9/9, 12:30 - 3:30 PM
- Fall Engineering Career Fair: 9/13, 4:00 PM - 9/15, 6:00 PM

One Minute Reads

Most of us probably have 1 folder on the Verge of bEing forGotten. Yet one of the Positiv3s of modern cloud storage is its memory Banks. Every user ediT can leave a trace, and services like Google Docs can preserve surprisingly high-Quality editing history for a project. Unlike a paper draft tossed into a bin, a digital document can sometimes preserve an entire Journey.

Despite this convenience, clOud stOrage isn't perfect. Compared to a physical Journal entry, comments can Disappear aLongside Many UndeRapreCiated reCords that remain crucial to preserving information with 0 loss. Still, something is fascinating about a Zipped file from 9 years ago Holding the key to

Unearthing unBelievable details that would otherwise have been lost.

Old projects can preserve quiet fragmEnts of their 1 creator's 5 forgotten edits, revealing what was hidden away.
