## Letter From the Historian

Welcome back TBPeople,

In today's meeting, we get to talk about *our wonderful electees* 🎉

To those who conducted electee interviews, I hope they went **smoothly** and no sociopathic entities were uncovered (if you would like to file a complaint with upper management, please dial 1-800-CALL-SAM). But seriously, if you actually found something concerning please do not hesitate to be honest with us.

This will in fact be a **voting meeting**.

Yes my beautiful children, settle down. Grab some delicious phree phood and relax with some puzzles; it will be done before you know it. Not only are we voting on the membership of our electees (check the Eligibility Code below), we will also be talking about some amendments to our bylaws. Look at you being all important, I could not be any more proud of you.

On another note, make sure you continue to sign up for events and tutoring! We got a lot of good things rolling your way so be on the lookout.

- Tony

### In This Issue

- Letter from the Historian
- Second Actives
- TBPhunPhacts
- TBPuzzles

### Second Actives Agenda

- Officer Updates
- Voting Procedure
- Electee Evaluations
- Bylaw Amendments

### Upcoming Events

- Magic the Gathering Draft Night: Oct 7th, 12-4pm
- Sandia Info Session: Oct 10th, 5-6pm
- MindSET II: Oct 22nd, 2:30-5:30pm

## Eligibility Code for new Members

In order that there may be a more uniform basis for selection of members for Tau Beta Pi, these suggestions are offered. It is expected that a copy of this statement be given to each active member before every election, and it may at times serve as a general expression of our policy in the selection of members.

It is the purpose of the Society to mark in a fitting manner those who have conferred honor upon their alma mater by distinguished scholarship and exemplary character as students, or by their attainments as alumni. Distinguished scholarship, while the primary requisite for admission, must not be considered the sole criterion. After the scholastic requirements have been fulfilled, the selection shall be based on integrity, breadth of interest both inside and outside of engineering, adaptability, and unselfish activity.

We consider that true integrity is the sine qua non for membership in Tau Beta Pi, that it transcends in importance scholarship, activity, and every other qualification. Without private and public integrity, we believe that no organization is worthy of existence. Under integrity, we include honor and high standards of truth and justice.

Breadth of interest sufficient for eligibility in this Association will enable people to maintain their positions in their community by the exercise of qualities other than engineering ability.

True engineers must be able to adapt themselves ingeniously to all circumstances and conditions, making them conform to the desired purpose. The rating of people on the degree of unselfish activity manifested, is intended to indicate that Tau Beta Pi believes that none can become worthy engineers without the welfare of associates, organizations, and the community at heart. It is furthermore expected that they display willingness to aid and assist in worthy causes by their actual campus record. However, the fact that people may not have shown unselfish activity to an appreciable degree throughout their courses of study is no infallible indication that they would not if the opportunity offered. The most conspicuous illustrations of this are those students who are self supporting, for which due allowance must be made and due credit given.

In fine, it is in this capacity for the unstinted giving of their best, without thought of remuneration, that we believe lies one of the most sensitive tests for determining candidates' rights to bear the name and wear the Bent of Tau Beta Pi.

## TBPhunPhacts! Did you know...

1. Venus is the only planet that rotates clockwise. She's definitely not like the other planets...
2. Orange or orange? The color was actually named after the fruit in the English language.
3. Lemons float in water, but limes sink. Talk about being sour and dense, good thing lemons will always rise to the occasion.
4. The first speeding ticket was given out in 1896 to a man driving at a whopping 8 miles per hour. What was the speed limit? 2 miles per hour. What a daredevil.

**This puzzle is a word search puzzle that has a hidden message in it.**

First find all the words in the list.

Words can go in any direction and share letters as well as cross over each other.

Once you find all the words. Copy the unused letters starting in the top left corner into the blanks to reveal the hidden message.
